Topic: LLM-aided Graph Repair in Property Graphs

SUMMARY

My research lies in the intersection of *Computational Linguistics*, *Natural Language Processing*, and *Graph Databases* with a particular focus on low-resource languages such as Sanskrit and other Indian languages. I intend to address the unique challenges faced by these languages, enhancing language understanding, and advancing knowledge extraction from unstructured data. I am committed to leveraging my interdisciplinary background to pioneer innovations, with a strong emphasis on creating a real-world impact. My interests also include *Artificial Intelligence*, *Databases*, *Human-Computer Interaction*, *Information Retrieval*, and *Data Mining*.
